Pelsis
digital

Intelligent pest management for
Highly sensitive applications

Pelsis Digital provides:
Remote, real-time monitoring of flying insect activity, allowing **immediate notification** of emerging problems, improved **data accuracy** and **less chemical use.**

Giving you the benefits of:
Significantly **reducing the risks** of product contamination, recalls and reputational damage, better satisfying **auditors** and **customers**, with improved sustainability.
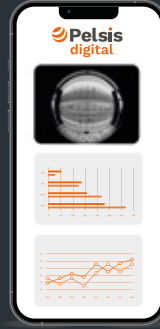

Pelsis Digital technology is now available within the hugely popular Cobra LED insect light trap.

- Unique Translucent Technology™ for improved insect attraction.
- Patented reflected light providing defused UV irradiance.
- 69% energy saving over traditional fluorescent lamp model

Pelsis Digital supports your business to:

✓	**Reduce risk of contamination:**	24/7, real-time monitoring of insect activity
✓	**Reduced risk of recalls**	Immediate detection of insect activity and population growth
✓	**Reduced cost of recalls**	Exact pinpointing of time and location of insect activity
✓	**Improve sustainability:**	Less chemical use, plus three-year UV source life and no mercury content
✓	**Faster problem resolution:**	Automated pinpointing of problem areas
✓	**Reduce audit burden:**	Automated and detailed data collection and presentation
✓	**Monitor proportionately:**	Fully flexible insect count threshold settings, triggering alerts

Remote data access through either **online portal** or **mobile app**

Robust connectivity through advanced cellular gateway, reducing connectivity costs.

A choice of monthly subscription packages, delivering unprecedented reporting flexibility and insight
